Re: Notification of Groundwater Protection Standard Exceedance pursuant to 40 CFR 257.95

A constituent in Appendix IV to part 40 CFR 257 was detected at a statistically significant level above the groundwater protection standard (GPS) established under 40 CFR 257.95(h) in a monitoring well located at the former M.L. Kapp Generating Station. The constituent exceeding the GPS is lithium, as sampled in monitoring well MW-306. MW-306 was previously a background monitoring well but is now designated as a downgradient well based on updated groundwater flow information. This notification has been prepared in accordance with 40 CFR 257.95(g) and 257.105(h)(8).

This notification applies to the following CCR units at this facility:

CCR units

KAP Main Ash Pond (closed)

Signed,

A handwritten signature in black ink that reads "Jessica E. Wilkening".
